Java
Spring Boot
HTML
CSS
Git
Leadership
Communication

Objective

Software engineer with 13 years of experience in operational management within the transportation industry, striving to confront new challenges through continuous learning while applying my leadership skills to the software development lifecycle.

Projects

Guessing Game

Developed a simple console-based guessing game using Java.

Temperature Converter

Created a temperature conversion program using Swing and IntelliJ's GUI builder.

Personal Website

Gained familiarization with HTML, CSS and the basic structure of front-end web development.

Certifications

Oracle Certified Foundations Associate, Java

Oracle, February 2023

Certified Scrum Master

Six Sigma Global Institute, May 2022

Leadership

Established and operated a small transportation company with ten employees for 13 years handling all operational aspects of business from managing ambiguity and adapting to situations when they arise to effectively communicating with customers and employees.
